

LIFTING SOLUTIONS FROM JOSTS

Scissor Lifts are one of very popular choices for Material Handling in Indian Industry. They are being used in wide range of applications. A properly designed and equipped scissor lift enhances logistic infrastructure and improves facility's competitiveness.

Scissor Lifts are being used for carrying out Maintenance and House Keeping jobs at tall heights, Lifting Goods to various levels in shop floors and stores, loading / unloading operations, work tables in shop floor and also for order picking operations in Warehouses. Josts offers Scissor Lifts for various applications to suit customer's needs and serves a variety of application in industries such as Engineering, Food, Pharmaceuticals, Manufacturing, Logistics etc

Jost's Scissor Lifts Wide Variety Comprises Of The Following:

Pit Mounted Scissor Lifts

- Capacities up to **25000 kg** and lift heights up to **12000 mm**
- Available in variations of heavy duty and medium duty lifts
- Ideal for loading / unloading and lifting operations
- Application area-dock lifts (Scissor Dock) and goods Lift

Floor Mounted Scissor Lifts

- Capacities up to **2000 kg** and lift heights up to **3000 mm**
- Extensively used in light duty applications for lifting goods to various lift heights
- Ideal for shop floor, assembly line, production line applications as lift tables
- Also available with turn table and also as low profile floor mounted scissor lift with the platform at the ground level

Vehicle Mounted Scissor Lifts

- Capacities up to **1000 kg** and lift heights up to **5000 mm**
- Ideal for maintenance purposes, house keeping and order picking jobs
- Available in variations of pedestrian operated or ride-on models with Jost's trucks
- Tailor made to customer's requirement

Mobile Scissor Lifts

- Capacities up to **1000 kg** and lift heights up to **12000 mm**
- Easily towable either manually or by powered vehicles
- Extensively used for light duty applications for lifting goods to various lift heights
- Ideal for carrying out maintenance as well as house keeping jobs at desired heights

Self Propelled Scissor Lifts

- Capacities up to **500 kg** and lift heights up to **12000 mm**
- Driven by AC motor and microprocessor based controller, the equipment can be operated from lift platform itself
- Ideal for maintenance purposes, house keeping and order picking applications
- Compact width fits most standard doorways and tight aisles
- Quieter, cleaner operation for a variety of environments

Goods Lifts (Mast Lifts)

- Capacities up to **2000 kg** and lift heights up to **12000 mm**
- Ideal for lifting loads to various levels in warehouses, offices and retail back end stores
- Available with suitable cage / enclosure arrangement for safety
- Tailor made to customer's requirement

Tandem Scissor Lifts

- Capacities up to **25000 kg** and lift heights up to **12000 mm** (depending on capacity)
- Two or more scissor lifts in combination and operated by a single hydraulic system
- Ideal for heavy duty assembly shop applications
- Can be used for jobs requiring long platforms

Twin Scissor Lifts

- Capacities up to **6000 kg** and lift heights up to **3000 mm**
- Two scissor lifts in tandem operation co-ordinated by a single hydraulic circuit
- Ideally suited in assembly shop operation for heavy duty jobs
- Tailor made to customers requirement

Jost's Scissor Lifts superior quality is ensured by precise manufacturing from high quality rolled ISMC channels. Safety features like Anti skid platform, Hose burst valve, Limit Switch, Emergency power cut-off switch, Platform railing, Protection against overloading ensures fail free safety.
